INTERNATIONAL SYMPOSIUM
II EDITION

ROME
5TH–6TH NOVEMBER 2026

Dear Colleagues,

following the success of our inaugural "All Around Pelvic Floor Anatomy" symposium held in April 2024, it is with great pleasure that we announce the second edition "ALL AROUND PELVIC FLOOR SURGERY - INTERNATIONAL SYMPOSIUM" which will take place on November 5th–6th in Rome.

Following the positive feedback and engagement from the 2024 event, we have expanded our focus to provide a comprehensive exploration of surgical techniques, innovations, and emerging technologies in pelvic floor surgery. This symposium brings together leading international experts and pioneers in the field to share their expertise, surgical approaches, and latest technological advancements.

The program will unite an exceptional community of professionals committed to advancing surgical excellence in pelvic floor disorders, featuring state-of-the-art demonstrations, innovative techniques, and cutting-edge technologies that are transforming patient care.

Key highlights of the symposium include:

- In-depth presentations on the latest surgical techniques and technological innovations in pelvic floor surgery.
- Live Surgery sessions - a cornerstone of the symposium - performed by expert surgeons demonstrating different surgical approaches with detailed anatomical perspectives, real-time commentary, and interactive Q&A sessions.
- Interactive sessions led by renowned international guests sharing breakthrough methodologies, clinical outcomes, and pearls of surgical wisdom.
- Comprehensive panel discussions exploring controversies, complications management, and future directions in pelvic floor surgery.

Further details, including the complete agenda, distinguished faculty, registration information, and accommodation options, will be shared with you in the coming weeks. In the meantime, please feel free to contact the organizing committee office at info@eludiaevents.it
